Dear Client,

We have a relationship built on privacy and integrity. Your personal information is important both to you and to our firm and we take measures to safeguard that information. We wish to remind you of some measures that you can take to protect your personal information and not become a victim of identity theft.

- Protect all Usernames, Passwords and PINs.
- Use complex passwords and PINs (for example - don't use your birth date!)
- Safeguard your computers with security software packages and install good anti-virus, anti-spam and spyware detection software. Also configure them to receive automatic updates.
- When visiting hot-spots or using unencrypted Wi-Fi connections, disable Wi-Fi mode to prevent unknown or rogue connections. Remember to disable file and printer sharing, as well.
- Never respond to emails that ask you for your personal information online. If we need to contact you for information, we will do so personally.
- Always review your account statements and store them in a safe place or consider shredding them.
- When paying with a credit or debit card, keep an eye on the server or customer representative. Make sure your card is the one being returned.
